Customer Problem Statement Template

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Freelancer)	A recent graduate starting a freelance career, looking for real projects that match my skills without searching across scattered sites.	browse open projects, filter them by my skills, and apply with my proposal, rate and portfolio.	after I apply I often don't know whether my application was seen, accepted or rejected, and I have no direct way to talk to the client.	many platforms don't show a clear status for each application and don't offer a simple chat channel once a client shows interest.	uncertain and discouraged, unsure whether to keep waiting or move on to other opportunities.
PS-2 (Client)	A small business owner or project owner who needs design or technical work done and wants to hire a reliable freelancer.	post a project with its budget, duration and required skills, compare proposals, and choose the right freelancer.	proposals, rates and portfolio links arrive through scattered emails and messages, which makes comparing and deciding slow.	without a dedicated platform there is no single place to review all applicants, approve one, reject the others and then discuss the work.	overwhelmed by the back-and-forth and worried about choosing the wrong person or wasting time and money.
